

SHOUT™

GUTS.

The Late Roll 46™ core this was designed to provide maximum length with stable control down lane. This core will produce a minimal amount of flare and strong hitting power through the pocket.

GRIT.

The 45L™ solid reactive coverstock was created to combat lighter oil conditions just like the Scream™. However, this coverstock will react sooner than the 42L™ pearl reactive coverstock and create a little earlier motion.

Factory Finish: *1500-grit Polished*

Flare Potential: *2" - 3" inches*

Coverstock: *45L™ Solid Reactive*

Color: *Red / Blue*

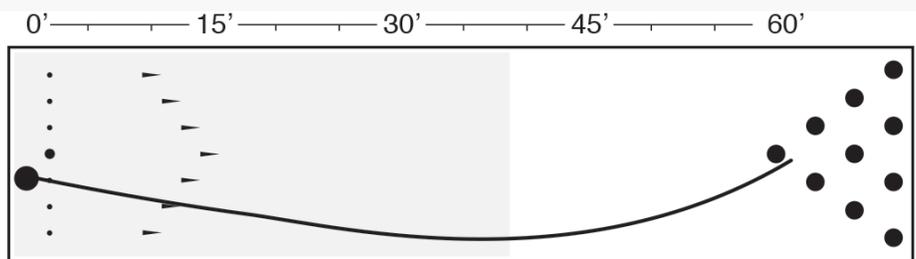

Hardness: *73-75 on D-scale*

GRIME.

The Shout was designed for those lighter oil conditions where you need a ball that provides you with good length and control at the break-point. In comparison, it will react sooner than the Scream.

Lane Condition - **Light**

The ball path represents Roto Grip's bowling ball tester. Ask your pro shop professional how this ball will work for you.

HOW TO KEEP YOUR NEW BALL REACTING STRONG

We strongly believe that preventative maintenance is the key to a cover's longevity.

WHY? The ball's ability to absorb lane oil into the pores helps to keep a dry ball surface in contact with the lane for more friction, creating added hook. Over a period of time, the bowling ball's performance will slowly deteriorate due to oil absorption and dirt build up on the ball's surface.

In addition to using a clean and dry Storm microfiber towel in competition, we highly recommend that a bowling ball cleaner be used immediately afterward to further clean the ball's cover. If a ball is used and then put away without cleaning, the oil and dirt will have a greater chance to be absorbed deeper into the cover.

We hear time and time again from people who have lost hook in their equipment and swear they clean it on a regular basis. Only when the question is asked about when they clean their equipment does the real problem come to light; cleaning a ball just before use removes only a very fine layer while the deeper trapped oil and dirt still remain from your last session. Below is our recommended procedure to maintain your ball's performance:

1. Use a clean, dry Storm microfiber towel during competition
2. At the end of the session, use Storm Reacta Clean™ and spray liberally over the entire surface of the ball
3. Rub your hands over the surface of the ball in a scrubbing motion for 15-20 seconds
4. Towel off the ball until dry

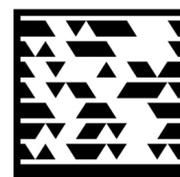

This process will assist the degreasing agent in the cleaner to draw oil and dirt out of the pores; the hand-action helps break down the oil and dirt, making it easier to be removed with a towel.

Ball Maintenance Checklist

WHEN	POLISHED BALLS	DULL BALLS
<i>Between Shots</i>	<i>Wipe with Storm Microfiber Towel</i>	<i>Wipe with Storm Microfiber Towel</i>
<i>After Bowling</i>	<i>Clean with Storm Reacta Clean</i>	<i>Clean with Storm Reacta Clean</i>
<i>Every 10 Games</i>	<i>Re-polish surface with Storm Reacta Shine™</i>	<i>Scuff surface with Abralon® pad to maintain original reaction</i>
<i>Every 30 Games</i>	<i>Scuff surface with Abralon and re-polish with Storm Reacta Shine</i>	
<i>Every 60 Games</i>	<i>Ball is due for full resurface process</i>
