

HP1  
HOOK POTENTIAL

# HUSTLE™ P-O-W

## CORE.

This unique multi-density core design provides outstanding midlane motion yet continues through the pin deck to get those pins dancing.

### Hustle™ Core

	16lb	15lb	14lb	13lb	12lb	11lb	10lb
RG VALUE:	2.53	2.53	2.55	2.63	2.65	2.73	2.77
RG DIFFERENTIAL:	0.030	0.030	0.030	0.009	0.011	0.012	0.015

## COVER.

The brand new Pumped Pearl Reactive cover will slide through the front part of lane with ease in order to combat those drier oil conditions.

- Factory Finish: 1500-grit Polished
- Flare Potential: Low - Medium
- Coverstock: Pumped™ Pearl Reactive
- Color: Pink - Onyx - White Pearl
- Hardness: 73-75 on D-Scale

## CONDITION.

The Hustle's were created with one thought in mind, provide the most versatility and reaction we have ever offered in the HP1 line.

Lane Condition - Medium/Light to Light Oil

The ball path represents Roto Grip's bowling ball tester. Ask your pro shop professional how this ball will work for you.

## HOW TO KEEP YOUR NEW BALL REACTING STRONG

We strongly believe that preventative maintenance is the key to a cover's longevity.

WHY? The ball's ability to absorb lane oil into the pores helps to keep a dry ball surface in contact with the lane for more friction, creating added hook. Over a period of time, the bowling ball's performance will slowly deteriorate due to oil absorption and dirt build up on the ball's surface.

In addition to using a clean and dry Roto Grip Shammy in competition, we highly recommend that a bowling ball cleaner be used immediately afterward to further clean the ball's cover. If a ball is used and then put away without cleaning, the oil and dirt will have a greater chance to be absorbed deeper into the cover.

We hear time and time again from people who have lost hook in their equipment and swear they clean it on a regular basis. Only when the question is asked about when they clean their equipment does the real problem come to light; cleaning a ball just before use removes only a very fine layer while the deeper trapped oil and dirt still remain from your last session. Below is our recommended procedure to maintain your ball's performance:

1. Use a clean, dry Roto Grip Shammy during competition
2. At the end of the session, use Storm Reacta Foam™ and spray liberally over the entire surface of the ball
3. Rub your hands over the surface of the ball in a scrubbing motion for 15-20 seconds
4. Towel off the ball until dry

This process will assist the degreasing agent in the cleaner to draw oil and dirt out of the pores; the hand-action helps break down the oil and dirt, making it easier to be removed with a towel.

### Ball Maintenance Checklist

WHEN	POLISHED BALLS	DULL BALLS
<i>Between Shots</i>	<i>Wipe with Roto Grip Shammy</i>	<i>Wipe with Roto Grip Shammy</i>
<i>After Bowling</i>	<i>Clean with Storm Reacta Foam</i>	<i>Clean with Storm Reacta Foam</i>
<i>Every 10 Games</i>	<i>Re-polish surface with Storm Reacta Shine™</i>	<i>Scuff surface with Abralon® pad to maintain original reaction</i>
<i>Every 30 Games</i>	<i>Scuff surface with Abralon and re-polish with Storm Reacta Shine</i>	
<i>Every 60 Games</i>	<i>Ball is due for full resurface process</i>
