

HP2
HOOK POTENTIAL

WINNER™

CORE.

Starting the with the same shape from the original Hotshot™ Core, we changed out the slug on bottom to totally change up the core dynamics. With a heavier slug, the RG value went down just a touch, while the differential went up almost 10 points. Lowering the RG and increasing the diff = more downlane change of direction!

Altered Hotshot™ Core

							
RG VALUE:	2.54	2.54	2.54	2.63	2.65	2.73	2.77
RG DIFFERENTIAL:	0.051	0.054	0.050	0.009	0.011	0.012	0.015

COVER.

The newest formulation of pearl coverstock known as the VTC-P18™ brings a new level of versatility to the HP2 line. This formula increases traction throughout the entire lane while still retaining energy for plenty of down lane responsiveness.

Factory Finish: *1500-grit Polished*

Flare Potential: *Medium*

Coverstock: *VTC-P18™ Pearl Reactive*

Color: *Red / Gold / Charcoal*

Hardness: *73-75 on D-Scale*

CONDITION.

This ball is hands down the strongest pearl ball ever released in the HP2 line. It will show its super powers on those Medium type conditions but can easily be scuffed to tackle a little more oil if need be.

Lets just say the name fits the performance and results you will get with this ball perfectly!

Lane Condition - **Medium**

The ball path represents Roto Grip's bowling ball tester. Ask your pro shop professional how this ball will work for you.

HOW TO KEEP YOUR NEW BALL REACTING STRONG

We strongly believe that preventative maintenance is the key to a cover's longevity.

WHY? The ball's ability to absorb lane oil into the pores helps to keep a dry ball surface in contact with the lane for more friction, creating added hook. Over a period of time, the bowling ball's performance will slowly deteriorate due to oil absorption and dirt build up on the ball's surface.

In addition to using a clean and dry Roto Grip Shammy in competition, we highly recommend that a bowling ball cleaner be used immediately afterward to further clean the ball's cover. If a ball is used and then put away without cleaning, the oil and dirt will have a greater chance to be absorbed deeper into the cover.

We hear time and time again from people who have lost hook in their equipment and swear they clean it on a regular basis. Only when the question is asked about when they clean their equipment does the real problem come to light; cleaning a ball just before use removes only a very fine layer while the deeper trapped oil and dirt still remain from your last session. Below is our recommended procedure to maintain your ball's performance:

1. Use a clean, dry Roto Grip Shammy during competition
2. At the end of the session, use Storm Reacta Foam™ and spray liberally over the entire surface of the ball
3. Rub your hands over the surface of the ball in a scrubbing motion for 15-20 seconds
4. Towel off the ball until dry

This process will assist the degreasing agent in the cleaner to draw oil and dirt out of the pores; the hand-action helps break down the oil and dirt, making it easier to be removed with a towel.

Ball Maintenance Checklist

WHEN	POLISHED BALLS	DULL BALLS
<i>Between Shots</i>	<i>Wipe with Roto Grip Shammy</i>	<i>Wipe with Roto Grip Shammy</i>
<i>After Bowling</i>	<i>Clean with Storm Reacta Foam</i>	<i>Clean with Storm Reacta Foam</i>
<i>Every 10 Games</i>	<i>Re-polish surface with Storm Reacta Shine™</i>	<i>Scuff surface with Abralon® pad to maintain original reaction</i>
<i>Every 30 Games</i>	<i>Scuff surface with Abralon and re-polish with Storm Reacta Shine</i>	
<i>Every 60 Games</i>	<i>Ball is due for full resurface process</i>
