

HP4™
HOOK POTENTIAL

HALO™

CORE.

Using a "cube like" shape as a starting point, additions and subtractions were made from there. The key being the radial disc shape added to the middle body of the core to increase the rotation/continuation of the core once in motion. This part took countless man hours and over 1 full year in development to become a reality.

Centrum™ Core

	16lb	15lb	14lb	13lb	12lb
RG VALUE:	2.49	2.49	2.54	2.57	2.59
RG DIFFERENTIAL:	0.050 0.018	0.050 0.018	0.050 0.015	0.032 0.010	0.029 0.008

COVER.

The MicroTrax-S18 formulation was first introduced on the IDOL™. This coverstock continues to be tested by our R&D team to ensure we haven't missed anything. To date, this blend still stands as the strongest solid coverstock formulation Roto Grip has ever introduced.

Factory Finish: *2000-grit Pad*

Flare Potential: *High*

Coverstock: *MicroTrax-S18™*

Color: *Coal / Fuchsia / Sky Blue*

Hardness: *73-75 on D-Scale*

CONDITION.

This ball was created to destroy and conquer the heaviest of conditions. By pairing the new super strong Centrum asymmetrical core with our strongest traction coverstock to date, the new HALO is a bowling ball revelation that is second to none. If you liked the original Hyper Cell™ or the original No Rules™, then this ball is for you! Think that same type of motion ONLY STRONGER!

Lane Condition - **Medium/Heavy to Heavy**

The ball path represents Roto Grip's bowling ball tester. Ask your pro shop professional how this ball will work for you.

HOW TO KEEP YOUR NEW BALL REACTING STRONG

We strongly believe that preventative maintenance is the key to a cover's longevity.

WHY? The ball's ability to absorb lane oil into the pores helps to keep a dry ball surface in contact with the lane for more friction, creating added hook. Over a period of time, the bowling ball's performance will slowly deteriorate due to oil absorption and dirt build up on the ball's surface.

In addition to using a clean and dry Roto Grip Shammy in competition, we highly recommend that a bowling ball cleaner be used immediately afterward to further clean the ball's cover. If a ball is used and then put away without cleaning, the oil and dirt will have a greater chance to be absorbed deeper into the cover.

We hear time and time again from people who have lost hook in their equipment and swear they clean it on a regular basis. Only when the question is asked about when they clean their equipment does the real problem come to light; cleaning a ball just before use removes only a very fine layer while the deeper trapped oil and dirt still remain from your last session. Below is our recommended procedure to maintain your ball's performance:

1. Use a clean, dry Roto Grip Shammy during competition
2. At the end of the session, use Storm Reacta Foam™ and spray liberally over the entire surface of the ball
3. Rub your hands over the surface of the ball in a scrubbing motion for 15-20 seconds
4. Towel off the ball until dry

This process will assist the degreasing agent in the cleaner to draw oil and dirt out of the pores; the hand-action helps break down the oil and dirt, making it easier to be removed with a towel.

Ball Maintenance Checklist

WHEN	POLISHED BALLS	DULL BALLS
<i>Between Shots</i>	<i>Wipe with Roto Grip Shammy</i>	<i>Wipe with Roto Grip Shammy</i>
<i>After Bowling</i>	<i>Clean with Storm Reacta Foam</i>	<i>Clean with Storm Reacta Foam</i>
<i>Every 10 Games</i>	<i>Re-polish surface with Storm Reacta Shine™</i>	<i>Scuff surface with Abralon® pad to maintain original reaction</i>
<i>Every 30 Games</i>	<i>Scuff surface with Abralon and re-polish with Storm Reacta Shine</i>	
<i>Every 60 Games</i>	<i>Ball is due for full resurface process</i>
